CHAPTER 4 – CABLE STRIPPING KNIFE

Cable stripping knife, time-tested through millions of uses, for round and longitudinal cuts, individually screw-adjustable cutting depth that eliminates damage to the inner conductors. Handle shells of wear-resistant polyamide. Both the tips of the inner cable stripping knives and the cutting edges of the attached clamping blades are coated with titanium nitride. At approx 500 °C, the cutting blade is vapour coated with titanium nitride in a vacuum chamber according to the PVD process. Excellent gliding qualities and high resistance to wear and abrasion are achieved through the reduced surface area structure and the extremely high level of hardness. TiN-coated blades can be used with significantly higher durability and cutting performance.

»JOKARI^{original} CABLE STRIPPING KNIFE SYSTEM 4 – 70

Design with changeable blades and TiN-coated safety blade. 2-component tool with improved ergonomics for better control during the stripping process and safe operation. Blade system very easy to exchange without using tools; blade size as delivered for cable diameter 8 – 28 mm. Adjustable and scalable inner blade for longitudinal and round cut. Protected hooked blade with adjustable depth; automatic protection mechanism in order to avoid unintentional slipping and cut injuries. TÜV/GS tested.
