Multipole Industrial Connectors
Aluminium Enclosures
Cable Glands and Fittings

Compact Catalogue

THE COMPANY

Westec represent the new Italian challenge in the market of Multipole Connectors for Industrial applications. A challenge born from 30 years experience in the designing and in the manufacturing of connectors for electric and electronic devices that pushes Westec in the continuous research for the achievement of new quality levels for the technical and operational aspects of its connectors. The constant industrial developments focusing on both the designing and the manufacturing, allowed Westec to make one of the best ranges of Multipole Connectors for industrial applications, introduced to the market with GWconnect brand.

The product range offers the ultimate value for money

- Certified in accordance with the latest European and American Standards by the most qualified independent laboratories in Italy.
- Accurately designed even for appearances' sake, to guarantee the excellence under any point of view.
- A complete series of aluminium junction boxes together with a good range of metal and plastic cable glands, join the heavy duty connectors to complete the offer and to render the purchasing process simpler and more efficient.

Direct link with the client

- Continuous collaboration with our customers allows us to obtain cohesive feedback on market needs and current demands. We utilize all feedback gained and use the information to develop new, innovative and competents solution in compliance with the Standards.
- Establishing a more personal relationship with clients allows us to offer a more transparent service where we can provide prompt responses on both technical and commercial enquiries.

An efficient and flexible internal organization

- The Italy base headquarter with its well-stocked warehouse, can supply efficiently the worldwide sales network.
- A flexible design approach allows Westec to manufacture special OEM solutions on customers' demand.
- A wide distribution network is available. Pls contact us at: info@westec.it to know your nearest distributor.

General characteristics

The multipole connectors for industrial purposes are used in electric and electronic machinery, robots, electric panels, control equipments and wherever connections are required for power, control and signal circuits.
The connectors are designed for heavy-duty industrial applications. They are suitable for use with alternate or direct current and facilitate the manufacturing process, installation and maintenance of sectional electric parts in complex machinery in accordance with European Standard EN 60204-1

Referring standards:

- EN 61984:** Connectors safety requirements and tests
- VDE 0627:** Connectors (DIN VDE 0627)
- EN 60664-1:** Insulation coordination for equipment within low-voltage systems
- VDE 0110:** Table 4 concerning clearance and creepage distances
- EN 175 301-801:** High density rectangular connectors, round removable crimp contacts
- EN 60947-7-1:** Low-voltage switchgear and controlgear. Ancillary equipments - Terminal blocks for copper conductors
- EN 60512:** Connectors for electronic equipments. Tests and measurements
- UL 1977:** Component connectors for use in data, signal, control and power applications
- CSA: C22.2 No.182.3:** Special use attachment, plugs, receptacles and connectors
- EN 60423:** Conduits for electrical purposes. Outside diameters of conduits for electrical installations and thread for conduits and fittings
- EN 50262:** Metric cable glands for electrical installation
- EN 60529:** Degree of protection provided by enclosures (IP degree)
- NEMA 250:** National (USA) Electrical Manufacturers Association. Class (Type) of protection.
- ANSI/UL 50:** Enclosures for electrical equipment, non environmental consideration
- ANSI/UL 50E:** Enclosures for electrical equipment, environmental consideration
- CSA C22.2 No.94-1-2:** Special purpose enclosures.
- NMX-J235/1-2:** ANCE: Association of Standardization and Certification (USA) Special purpose enclosures

- DIN 40050-9 / ISO 20653:** Electrical equipments in road vehicles. Enclosures. Water test with high pressure. IP69K.
- NEMA ICS5:** Food and beverage industries. High pressure power wash test procedure for self contained control-circuit devices.

Connectors compliant with DESINA® standard

DESINA® (Distributed and Standardized INstAllation technology) is an innovative installation system studied by the German manufacturers of machine tools association (VDW), with the cooperation of users (including German automotive manufacturers) and component manufacturers, which has led to the introduction of a specification aimed to standardize electrical, hydraulic and pneumatic components and their interconnection on common platform for CNC controlled machine tools and manufacturing lines.
The DESINA® specification has been enclosed into ISO TC 184/SC1 "Industrial automation systems and integration / Physical device control" as an ISO standard.

The ISO standards are the following:

- ISO 23570-1:** Industrial automation systems and integration - Distributed installation in industrial applications:
Part 1 - Sensors and actuators.
- ISO 23570-2:** Industrial automation system and integration. Distributed installation in industrial applications.
Part 2: Hybrid communication bus
- ISO 23570-3:** Industrial automation system and integration. Distributed installation in industrial applications.
Part 3: Power distribution bus

DESINA® specifications

EUROMAP recommendations:

The inserts and the relevant enclosures meet the EUROMAP Recommendations (European Committee of machinery manufacturers for the plastic and rubber industry)
EUROMAP 12, 13, 14, 16, 67, 67.1, 71

Approvals: UL, CSA File E249674

The connectors are designed and manufactured to conform with EN 61984, EN 175 301-801, UL 1977 and CSA C22.2 182.3 standards.

The enclosures are designed in conformance with UL 50, UL 50 E and CSA C22.2 No. 94-1-2
Inserts and enclosures are certified and labelled with the UL and CSA marks: file E249674

The Westec connectors are therefore in conformance with both European/International and American system.
This permits them to be used in a wider range of applications worldwide.

General characteristics

Inserts:

The inserts are made of self-extinguishing thermoplastic resin UL 94 V0, GWT 960°, normally used in maximum temperature of 125°C. The inserts are available in screw, spring, crimp and screw form with terminal block connections. The contacts are in silver or gold plated copper alloy. All are numbered on both sides by laser printing or molding in accordance with EN 60068-2-70.

- Suitable for use with alternate or direct current
- Leading protective ground
- Polarized for correct mating
- Interchangeable for male and female inserts in hoods and housings
- Captive screws
- Can be used with hoods and housings, or with rack and panel applications.

Conductors connection, termination:

- Screw terminals
- Crimp terminals
- Screw terminals with terminal block
- Spring terminals

Enclosures:

A large variety of enclosures is available with different combination of components and materials, each one suitable to a specific industrial installation for normal environmental conditions and aggressive environments.

The principal parts are made in die-cast aluminium alloy with a finishing of polyester powder (Natural aluminium for EMC version) or in self extinguishing thermoplastic. They are resistant to impact and strong mechanical stress. Coupling stability and protection against accidental opening are assured by a single or double locking system, comprising of monoblock levers in galvanized steel or stainless steel, springs and pegs in stainless-steel or plastic.

Sealing is assured by special gaskets that protect the inserts inside the enclosures against dust, water and other aggressive agents.

- Innovative design
- Hoods/housings for normal environmental conditions and EMC
- Hoods/housings for harsh environmental requirements
- Degree of protection according to EN 60529: IP66 / IP67 / IP69K
- Degree of protection according to ANSI/UL50, 50E, NEMA 250 Type 4/4x/12
- Electrical connection with protective ground
- High mechanical strength and vibration resistance ensured by locking levers
- Spring-loaded lockable metal covers

Cable glands, fittings and accessories:

- Extensive range of cable protection and sealing accessories
- Metal cable glands IP65/IP66
- Plastic cable glands IP66
- Metal cable glands IP68
- Plastic cable glands IP68
- Fittings for flexible conduits
- Hexagonal nuts
- Enlargers/reducers
- Code pins for incorrect mating protection

Tools:

To guarantee the efficiency and security of the connection and to ensure that maximum quality standards are met, a complete series of application specific tooling is available for contact crimping and cable assembling

Metal Boxes:

A wide range of aluminium boxes with protection are offered as a solution to a wide range of installations, such as circuit breaking, connection and control of electric and electronic equipments.

Design and testing:

The connectors and the other products of this series have been designed and tested in Italy to meet the exact electrical and environmental standards set down within industry guidelines

CE Marking:

In accordance with Low Voltage Device (LVD) Directive 2006/95/EC

RoHS Compliance:

The products are in accordance with the European Directive 2002/95/EC and its amendments Directive 2008/35/EC on the use of certain hazardous substances in electrical and electronic equipments (RoHS)

EMC Compliance:

The hoods/housings EMC type are in conformity with European Directive 2004/108/CE (EMC = Electromagnetic Compatibility)

Technical support:

For any question and technical support please contact your nearest dealer or contact us directly at : info@westec.it

Remarks:

It is the users responsibility to ensure that products of this catalogue comply with regulations other than those stated when used in special fields of applications which we are unable to foresee, and that are assembled and installed correctly, in accordance with the installation Standards.

Westec Srl is not responsible for the installation result and/or in case of incorrect use of the products supplied.

Connectors should not be coupled and de-coupled under electrical load.

For spring terminal inserts, the correct cable assembly is assured only by using the correct screwdriver shown on the catalogue.

For screw terminal inserts is necessary to apply the correct torque in order to avoid false contacts or damages to the conductor, to the screw end to the contact itself.

Westec guarantee the IP degree of the Aluminium boxes as shown on the catalogue and manufactured, without holes and other milling operations. It is the users responsibility to verify the maximum number of holes for the cable entries, that must be in conformance with the specific application, as well as the type and size of cable glands, blanking plugs and/or other fittings that must have an equivalent or higher IP degree than the one of the junction box.

In the interest of development and improvement we reserve the right to amend, without notice, details contained in this publication.

No legal liability will be accepted by Westec for any errors, omissions or amendments.

This catalogue must not be used or reproduced in any form or manner without our prior approval in writing.

The shape of performance

Design and innovation

Technical features

- 1) A wide range of accessories comprising of: cable glands, fittings for flexible conduits, blanking plugs, enlargers, reducers and lock units.
- 2) Threaded cable passage in various Pg and metric thread (in accordance with EN 60423) available, for cable entry devices in accordance with EN 50262, as option located vertically, horizontally or at the front. NPT threads on request.
- 3) Heavy duty enclosures in die-cast aluminium alloy or self-extinguishing thermoplastic. Surface mounting or bulkhead housings and hoods are available, with or without fixed covers or with mobile protection covers. The enclosures for the use at a voltage of 500V have two tabs that prevents the insertion of inserts for the use with 830V. Those for the use with a rated voltage of 830V do not have any tabs and supplementary insulating strips are applied.
- 4) Metal enclosures powder coated with high resistance to mechanical stress and external agents, Enclosures used for harsh environments are treated with special polyester powder coating. Certified UL/CSA.
- 5) Insert in self-extinguishing thermoplastic material reinforced with glass fibres, UL approved, with a limit working temperature from -40°C to +125°C.
- 6) Inserts with asymmetric guide rails for preventing incorrect coupling. The inserts have a mechanical duration equal to or over 500 mating / unmating cycles.
- 7) Inserts manufactured to conform with EN 61984, VDE 0110, VDE 0627, EN 175301-801, UL 1977 standards. They are certified and labelled with the UL and CSA marks.
- 8) Special seal gaskets in anti-ageing, oil-resistant and fuel resistant vinyl nitrile elastomer or fluoro elastomer (for use in harsh environments) together with the joints provide an IP66 degree of protection for coupled connectors.
- 9) Monoblock galvanized steel or stainless steel or self-extinguishing glass filled thermoplastic material locking levers guarantee a perfect closure and sealing.
- 10) Locking device available in two versions, simple (with one lever) or double (with two levers).
- 11) Captive insert fastening screws, with anti-loosening flexible washer.
- 12) Contacts position identified with numbers on both sides of each insert, laser printed or moulded.
- 13) Contacts in silver or gold-plated copper alloy with connection to the conductors made via captive screws, crimping terminals, spring terminals or screws with incorporated terminal block.
- 14) Earth terminal with wide contact surface.
- 15) Stainless steel pegs that facilitate the locking and eliminate damages.
- 16) Captive contact screws, stainless steel wire protector.
- 17) **CE marking attesting the conformity to the requirements of the Directive Low Voltage Device (LVD) 2006/95/EC and of the Directive EMC 2004/108/EC for the products developed for industrial applications that require Electromagnetic Compatibility (EMC).**

Size and identification of enclosures and inserts

Size and identification of the enclosures and inserts

There are a large number of connector inserts and their relative enclosures so the selection of a correct combination may be complex. To facilitate this operation as well as the normal item/part No., a further identification parameter has been introduced: the "size" value. The "size" value refers to the screw fixing centre distances which constitute a unique element since they are common to both the inserts and enclosures. This is as indicated in the above illustration and the table below. The following table shows all the sizes of the enclosures and the dimensions of the housings where the inserts will be assembled.

Type	Enclosure «Size» identification	Housing space for inserts with screw fixing centre distance x-y
3A	«21 x 21»	(21 x 21mm) *
10A	«49x16»	49,5 x 16 mm
16A	«66x16»	66 x 16 mm
32A	«66 x 40»	66 x 16 mm (2 inserts)
6B	«44 x 27»	44 x 27 mm
10B	«57 x 27»	57 x 27 mm
16B	«77 x 27»	77,5 x 27 mm
24B	«104 x 27»	104 x 27 mm
32B	«77 x 62»	77,5 x 27 mm (2 inserts)
48B	«104 x 62»	104 x 27 mm (2 inserts)
QD	«32 x 13»	32,2 x 13,4 mm

* The screw fixing centre distance cannot be given because they only have one screw: «21 x 21» indicates the size of the sectioned insert.

Technical characteristics and applications

The enclosures are designed in conformance with EN61984 and ANSI/UL50, ANSI UL50E and CSA C22.2 No. 94.1-2

- Types available:

- STD :** For standard applications for inserts up to 250V or 500V
- STD-HV :** For standard applications for inserts up to 830V (*)
- HE :** For harsh environmental requirements and inserts up to 250V or 500V (*)
- HE-HV :** For harsh environmental requirements and inserts up to 830V (*)
- EMC:** For applications that require electromagnetic compatibility (EMC), for inserts up to 500V (*)
- (*):** These types are available in the Westec General Catalogue

- Single locking system (1 lever) - Single locking system with central lever
- Double locking system (2 levers) - Reversed locking system
- Metric or Pg thread available for Metric and Pg cable glands IP66 and IP68
- Enclosures with NPT threads are available on request for American market
- For flat cables
- Degree of protection according to EN 60529 for coupled hood/housings with cable glands: IP66/IP67
- Class of protection in accordance to ANSI / UL50E Type 4,4x,12, NEMA 250 Type 4/4x/12
- Water jet with high pressure resistant according ISO20653/DIN40050-9 (IP69K)
- Limiting temperature: - 40°C ÷ + 125 °C
- SC - standard construction: with small dimensions
- HC - high construction: bigger size for wider cable diameter
- Certifications:

Material	STD	STD-HV	HE	HE-HV	EMC
Body	Die cast aluminium alloy - Also in polyamide material for STD type				
Surface	Polyester powder coated		Polyester powder coated		Surface with high conductivity
Color	Grey RAL 7037		Black RAL 9005		Aluminium finishing
Pegs	Stainless steel				
Screws	Stainless steel				
Springs	Stainless steel				
Levers	Galvanized steel or stainless steel		Stainless steel		Galvanized steel or stainless steel
Gaskets	NBR		NBR		Conductive elastomer

Certification in accordance with ANSI/UL50, ANSI/UL50E and NEMA 250

Westec MIC connectors enclosures successfully passed ANSI/UL50, ANSI/UL50E and NEMA 250 Type 4, Type 4x and Type 12 testing at Underwriters Laboratory (UL) under the connector category ECBT2 (USA) and ECBT8 (Canada) .

We can declare that the MIC connectors not only meet the European and the International requirements stated in the EN 61984 which the MIC connectors refer to in general and in particular to IEC/EN60529 regarding the IP degrees of protection of the enclosures, but also meet the requirements of American Standards, ANSI/UL50, ANSI/UL50E and NEMA 250 that defines the type classifications for enclosures and control cabinets.

ANSI: Approved American National Standard

UL: Underwriters Laboratories Inc.

In the US the NEMA Association (National Electrical Manufacturer's Association) is one of the major organizations responsible for writing the national electrical standards and requirements of electrical equipments.

Its membership consist mainly of electrical manufacturers and end users.

The NEMA 250 is the document that defines the Type classification for enclosures in the United States.

The NEMA 250 not only takes in consideration the necessary requirements for the protection of the personnel and against the ingress of objects and water as provided by the IEC/EN60529 Standard but numerous other requirements covered by NEMA Type designations, which go beyond the IEC 60529/IP codes.

That is

- Construction requirements
- Door and cover securement
- Corrosion resistance
- Effects of icing
- Gasket ageing and oil resistance
- Coolant effects

The NEMA 250 defines the Type for the enclosures:

The types are listed in the page 00.47 of Westec General Catalogue.

For this reason, IP code designation cannot be converted to enclosure NEMA 250 type numbers.

Most American customers require enclosures with NEMA, UL or CSA rating.

The MIC connectors of Westec have the advantage of not only meeting the International IP requirements, but also fully meeting the requirements of ANSI/UL50, ANSI/UL50E, NEMA 250 Type 4, Type 4x and Type 12, that is:

Type 4: Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt, rain, sleet, snow, windblown dust, splashing water and hose-directed water; and that will be undamaged by the external formation of ice on the enclosures.

Type 4x: Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt, rain, sleet, snow, windblown dust, splashing water and hose-directed water; and corrosion; and that will be undamaged by the external formation of ice on the enclosures.

Type 12: Enclosures constructed (without knockouts) for indoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt, circulating dust, lint, fibers, and flyings; against dripping and light splashing of non-corrosive liquids; and against light splashing and consequent seepage of oil and non-corrosive coolants.

Compliance with NEMA requirements is voluntary.

NEMA does not require enclosures to be tested by qualified evaluators, but the UL Certification assures that the MIC connectors of Westec conform the US requirements, also guarantee the clients/users manufacturers of control cabinets and other electrical equipments the conformity to the NEMA and high rating of their products.

For the above the enclosures for MIC made by Westec can be marked with:

Enclosures applications:

In accordance with the standards and certifications all Westec enclosures are for indoor and outdoor uses: what therefore suggests the use of the polyester from aluminium enclosures STD Standard or HE for harsh environmental requirements?

The users shall consider the following:

polyamide enclosures compared with aluminium enclosures are limited by lower working temperature, high rate of ageing due to light, variation of temperature, sensitivity to the humidity, lower mechanical and impact strength, lower heat dissipation lower resistance and chemical agents.

Either Westec aluminium enclosures STD/STD-HV and HE/HE-HV are designed, manufactured and certified for indoor and outdoor use in accordance the same International Standards and accordingly certified, but the HE/HE-HV enclosures are designed for more severe applications in harsh environments taking in consideration a higher resistance to salt atmosphere, corrosive liquids and higher resistance of the painted surfaces to the impacts of splashing water and hose-direct water even with high pressure.

The EMC enclosures are designed for indoor and outdoor use too, but as the aluminium surfaces is not painted, though protected by special galvanic treatment, they shall be used in not particularly aggressive environments.

Enclosures Part No.	Cable glands for enclosures
<p>To facilitate the identification of the several versions of the enclosures, some digits of the part No. have a meaning in accordance with the following rules:</p> <p>Part No.:</p> <p>78XX.ABCD.Y</p> <p>78: Indicates the enclosures</p> <p>XX: Indicates the size in accordance with the following</p> <p>XX = 03 Size 3A «21x21»</p> <p>XX = 06 Size 6B «44x27»</p> <p>XX = 10 Size 10A «49x16» and 10B «57x27»</p> <p>XX = 13 Size QD «32x13»</p> <p>XX = 16 Size 16A «66x16» and 16B «77x27»</p> <p>XX = 24 Size 24B «104x27»</p> <p>XX = 32 Size 32A «66x40» and 32B «77x62»</p> <p>XX = 48 Size 48B «104x62»</p> <p>ABCD: serial number without any particular meaning</p> <p>Y: Indicates the version in accordance the following</p> <p>Y = 0 STD series</p> <p>Y = 1 HE series</p> <p>Y = 2 STD - HV series for 830V inserts</p> <p>Y = 3 HE - HV series for 830V inserts</p> <p>Y = 4 EMC series</p> <p>Y = 5 Hoods STD series without threaded fitting</p> <p>Y = 6 Hoods HE series without threaded fitting</p> <p>Y = 7 Hoods STD - HV series for 830V inserts without threaded fittings</p> <p>Y = 8 Hoods HE-HV series for 830V inserts without threaded fittings</p> <p>Y = 9 Hoods EMC without threaded fitting</p> <p>Y = A, B, etc Special types</p> <p>Note:</p> <p>Part No. bold letters refer to standard availability. Normal letters refer to items on special request.</p>	<p>The cable glands on the enclosures are used to protect and lock the cables with the enclosures ensuring the IP protection of the assembling connectors, enclosures, cable gland.</p> <p>Westec suggest the use of aluminium enclosures with metal cable glands only because these glands only can guarantee the performances of the enclosures: with metal cable glands we can reach the maximum mechanical resistance at pulling, shocks and vibration at the maximum rated temperature (+125°C).</p> <p>The polyester cable glands, can be used only in light environmental conditions and with lower temperature and mechanical strength.</p> <p>We recommend to use the IP68 metal cable gland with big size cable, because they can offer the biggest resistance at mechanical strength like side pulling and cycle movement, guaranteeing the IP degree of protection.</p> <p>Taking head of the above warnings, it's the user responsibility to select the right cable gland from the following series available:</p> <ul style="list-style-type: none"> - IP66 polyamide cable glands - IP66 metal cable glands - IP68 polyamide cable glands - IP68 metal cable glands <p>(please see Westerc General Catalogue)</p> <p>With HC high construction enclosures the using of metal cable glands IP68 is the best solution.</p> <p>Westec offers a wide range of enclosures with a wide range of both threadings Metric and Pg in accordance with market and customers requirements.</p> <p>For coupling with tubes and fittings with NPT thread Westec offers a range of adapters Metric - NPT and Pg - NPT.</p> <p>(please see Westerc General Catalogue)</p> <div style="display: flex; justify-content: space-around;"> <div data-bbox="858 1496 1133 1523">IP66 polyamide cable glands</div> <div data-bbox="1204 1496 1412 1523">IP66 metal cable glands</div> </div>  <div style="display: flex; justify-content: space-around;"> <div data-bbox="858 1736 1133 1762">IP68 polyamide cable glands</div> <div data-bbox="1189 1736 1428 1762">IP68 metal cable glands</div> </div> 

Electrical data for connectors are specified as per EN 61984.

This example identifies a connector suitable for use in an unearthed power systems or earthed delta circuit

This example identifies a connector suitable exclusively for use in earthed power systems

- 1) The polarities indicated in brackets are obtained using two inserts
- 2) See the inserts load diagrams to determine the actual limit working current according to the ambient temperature.
(please consult the Westec General Catalogue)

Remark:

All inserts manufactured by Westec are suitable for stranded and solid conductors. According to EN61984 connectors should not be coupled and decoupled under electrical load.

Housing with automatic cover	Surface mounting housing with automatic cover			Surface mounting housing with automatic cover			
	 <p>PATENTED</p>			 <p>HC - High construction PATENTED</p>			
Technical characteristics	Size	Thread	Part No.	Size	Thread	Part No.	
<p>The housing are provided with a special closing system that allows the fastening of the cover and to achieve the IP66 degree fully automatically.</p> <p>IP69K protection degree with lever.</p> <p>When the operator disconnects the mobile connector from the machine for any reason, transport, maintenance, cleaning etc., shall protect the insert of the fixed connector applying and manually locking the cover by the lever of the mechanical locking system: this to avoid that the further operations will cause the damage of the fixed connector and of the electrical equipment if the bulkhead housing are used.</p> <p>The new Westec housings with automatic cover protect the fixed connectors and the electrical equipments on which they are assembled fully automatically: just when the mobile connector is disconnected.</p> <p>The fastening of cover is obtained with a combination of a magnetic and a mechanical mechanism that permit the tight closing of the cover.</p> <p>The opening of the cover is facilitated by pushing the lever in the opposite direction.</p> <p>These housings can be mated with all mobile enclosures with single locking system with one lever.</p> <p>They are also compatible with the metal hoods made by other makers though we guarantee the best performance and the precise conformity with the Standards when Westec inserts, enclosures and cable glands are used.</p> <p>We suggest to verify the use near components sensible to strong magnetic fields.</p> <p>PATENTED</p>	<p>6B «44 x 27» M 20 7806.7251.0</p> <p>6B «44 x 27» M 20X2 7806.7252.0</p> <p>6B «44 x 27» Pg 16 7806.7211.0</p> <p>6B «44 x 27» Pg 16X2 7806.7212.0</p> <p>10B «57x 27» M 20 7810.7253.0</p> <p>10B «57x 27» M 20X2 7810.7254.0</p> <p>10B «57x 27» Pg 16 7810.7213.0</p> <p>10B «57x 27» Pg 16X2 7810.7214.0</p> <p>16B «77x 27» M 25 7816.7255.0</p> <p>16B «77x 27» M 25X2 7816.7256.0</p> <p>16B «77x 27» Pg 21 7816.7215.0</p> <p>16B «77x 27» Pg 21X2 7816.7216.0</p> <p>24B «104x27» M 25 7824.7257.0</p> <p>24B «104x27» M 25X2 7824.7258.0</p> <p>24B «104x27» Pg 21 7824.7217.0</p> <p>24B «104x27» Pg 21X2 7824.7218.0</p>			<p>6B «44x27» M25x2 7806.7220.0</p> <p>6B «44x27» M 32 7806.7221.0</p> <p>6B «44x27» M 32X2 7806.7222.0</p> <p>6B «44x27» M 40 7806.7223.0</p> <p>6B «44x27» M 40X2 7806.7224.0</p> <p>6B «44x27» Pg 21 7806.7225.0</p> <p>6B «44x27» Pg 21X2 7806.7226.0</p> <p>6B «44x27» Pg 29 7806.7227.0</p> <p>6B «44x27» Pg 29X2 7806.7228.0</p> <p>10B «57x27» M25x2 7810.7229.0</p> <p>10B «57x27» M 32 7810.7230.0</p> <p>10B «57x27» M 32X2 7810.7231.0</p> <p>10B «57x27» M 40 7810.7232.0</p> <p>10B «57x27» M 40X2 7810.7233.0</p> <p>10B «57x27» Pg 21 7810.7234.0</p> <p>10B «57x27» Pg 21X2 7810.7235.0</p> <p>10B «57x27» Pg 29 7810.7236.0</p> <p>10B «57x27» Pg 29X2 7810.7237.0</p> <p>16B «77x27» M25x2 7816.7238.0</p> <p>16B «77x27» M 32 7816.7239.0</p> <p>16B «77x27» M 32X2 7816.7240.0</p> <p>16B «77x27» M 40 7816.7241.0</p> <p>16B «77x27» M 40X2 7816.7242.0</p> <p>16B «77x27» Pg 21 7816.7243.0</p> <p>16B «77x27» Pg 21X2 7816.7244.0</p> <p>16B «77x27» Pg 29 7816.7245.0</p> <p>16B «77x27» Pg 29X2 7816.7246.0</p> <p>24B «104x27» M 32 7824.7247.0</p> <p>24B «104x27» M 32X2 7824.7248.0</p> <p>24B «104x27» M 40 7824.7249.0</p> <p>24B «104x27» M 40X2 7824.7250.0</p> <p>24B «104x27» Pg 21 7824.7201.0</p> <p>24B «104x27» Pg 21X2 7824.7202.0</p> <p>24B «104x27» Pg 29 7824.7203.0</p> <p>24B «104x27» Pg 29X2 7824.7204.0</p>

Type: STD for inserts up to 500V S-D, S-DD, S-E, S-ES, S-ESHV, S-EE, S-HSB, S-K, S-M series

For more technical details and STD-HV, HE, HE-HV, EMC types, please consult the Westec General Catalogue

Accessories, cable glands and tools see page: 42 + 51

Technical characteristics

UL Type 4/4x/12
 CE (RoHS)

- ▣ Housing with cover with single or double locking system
 Technical characteristics:

- **Type:** - STD for standard industrial applications
 - HE for harsh environmental requirements
 - EMC for EMC applications
- **Size:** 32A «66x40»
- **Material:** Body and cover: aluminium alloy
 Painting: polyester powder coating
 EMC finishing: Aluminium natural color
 Locking device: stainless steel
- **Operating temperature** -25°C ÷ 125°C
- **Protection degree** IP66

For more details please consult the Westec General Catalogue

- ▣ Power sockets for European and International market
- ▣ Standard interfaces for easy connection of devices within and outside of control cabinet
- ▣ Suitable for:
 - Standard industrial applications (STD)
 - For Harsh environmental requirements (HE)
 - For applications that require electromagnetic compatibility (EMC)
- ▣ Horizontal and vertical mounting
- ▣ Modular assembly, suitable for different adaptors plates
- ▣ Lockable metal cover by levers
- ▣ IP66 protection degree (with closed cover)
- ▣ High resistance to mechanical impacts
- ▣ High resistance to high and low temperature
- ▣ EMC shielding with EMC housings
- ▣ Compact design
- ▣ Termination technology of data connectors
 - The system is based on a wide range of data connectors that can be connected into both sides (gender changers) without any soldering or crimping.
- ▣ Modular system
 - The system is based on a bulkhead housing with a cover to be assembled on the panel. This housing is flexible enough to host a series of modules with different power sockets or data interfaces in accordance with the relevant standards. This allows the ports to satisfy customer demand.
 - Blank panels permit other interfaces to be assembled on customer demand.
- ▣ Assembled cables
 - A wide range of assembled cables which connect the interfaces to the equipment are also available.

Cable gland for ribbon cables

Patented

IP protection:

IP66 / IP69K

Working temperature:

-40°C ÷ +100°C

Materials:

Pa 66 UL94 V-0

Gaskets:

Silicon

Characteristics

Special design of clamping die, sealing and rubber part prolonging cable life. Waterproof, dustproof, and high resistance to salt, acid, alkali, alcohol, grease and general solvent.

Applications

For sealed enclosures and boxes, where ribbon cable are used

Color: Grey RAL 7037, other colors on request

For single conductor

The bush terminals are convenient for connecting stranded wires to connector inserts and terminal blocks with screw terminals. They are in accordance with DIN 46228/4

Materials:
Copper tin plated (insulation - PP)
Colors in accordance DIN STD and French standard

Crimping tools see page 52

General technical characteristics and applications

- Metal enclosures for installation, circuit breaking, connection and control of electric and electronic equipments.

- For industries, automotive, railways, navy, tunnels, parkings, industrial buildings

- The enclosures are in conformance with the Low Voltage Directive 2006/95/EC, with EMC Directive 2004/108/EC where applicable and with the Standards:

EN 60670-1	Boxes and enclosures for electrical accessories for household and similar fixed electrical installation.
EN 60670-22	Particular requirements for connecting boxes and enclosures.
EN 62208	Empty enclosures for low voltage switchgear and controlgear assemblies.
NEMA 250	National (USA) Electrical Manufacturers Association. Class (Type) of protection.

- High mechanical strength and vibration resistance.

- Captive screws

- High protection against magnetic interferences

- Anti-ageing materials, water resistant, oil resistant, grease resistant and fuel resistant.

- The enclosures can be mounted by using external flanges or internally through holes.

- Inside the boxes the DIN rail or the metal plate, supplied as accessory, can be assembled for mounting terminal blocks, breakers, fuse holders, control devices, transformers, electronic circuits, connectors, etc.

- 6 series are available:

- 1 - Standard with polyester powder coating grey RAL9006
- 2 - Standard with polyester powder coating grey RAL7035
- 3 - Standard with polyester powder coating grey RAL7037
- 4 - Sandblasted without coating
- 5 - EMC series. Sandblasted without coating.
- 6 - HE type for harsh environmental and for high temperature up to 210°C.
Black RAL9005 with polyester powder coating

- The enclosures HE series have the best performances of the enclosures HE series for the MIC connectors: These performances are listed on pages 18.05, 18.15 and 18.16 of Westec General Catalogue.

- 8 sizes are available:
from 90 x 90 x 53 mm, size 1 (S1)
to 392 x 298 x 144 mm, size 7 (S7)
Size S-3 with high cap (HC)

- Protection degree according to EN 60529: IP66

- Protection degree according to NEMA 250: Type 4,4x,12,13
Type 4x, with coated surfaces only

- Working temperature: - 40°C ÷ + 125°C (210°C HE Type)

- With ground terminal on box and on cover by using trilobate screw for better ground contacts and low electrical resistance

- Not coated internally to guarantee the electrical conductivity of the internal surface for better ground protection

- Materials

- Body and cover: - Die-cast aluminium alloy
- Colors: Type STD Grey RAL 9006
Type STD Grey RAL 7035
Type STD Grey RAL 7037
Type HE Black RAL 9005
Type sandblasted Al natural color
EMC: Al natural color
- Coating: - Polyester powder
- Gaskets: - In anti-ageing, oils, greases and fuel resistant silicone
- Screws: - Steel with Geomet® treatment to prevent corrosion especially with aluminium parts
- Steel zinc plated for screws used internally
- Metal plates: - Steel zinc plated

Technical characteristics and applications of ATEX versions

RoHS

- Metal enclosures for installation, circuit breaking, connection and control of electric and electronic equipments.
- For industries, automotive, railways, navy, tunnels, parkings, industrial buildings
- ATEX versions are in conformance with the European Directive 94/9/EC and to the Standards:

EN 60079-0:	General apparatus for explosive gas atmosphere Part 0: General requirements.
EN 60079-1-10:	Enclosures for explosive atmosphere. Class of the zone.
EN 60079-15:	Electrical apparatus for explosive gas atmospheres. Construction, testing and marking.
EN 61241-1-10:	Electrical apparatus in the presence of combustible dust. Part. 1-1: Electrical apparatus protected by enclosures - Construction and testing. Part 10: Class of zone.

- High mechanical strength and vibration resistance.
- Captive screws
- High protection against magnetic interferences
- Anti-ageing materials, water resistant, oil resistant, grease resistant and fuel resistant.
- The enclosures can be mounted by using external flanges or internally through holes.
- Inside the boxes the DIN rail or the metal plate, supplied as accessory, can be assembled for mounting terminal blocks, breakers, fuse holders, control devices, transformers, electronic circuits, connectors, etc.
- 8 sizes are available
- Degree of protection according to EN 60529: IP66
- Working temperature in accordance with ATEX: $-20^{\circ}\text{C} + 85^{\circ}\text{C}$
- With ground terminal on box and on cover by using trilobate screws for better ground contacts and low electrical resistance
- Not coated internally to guarantee the electrical conductivity of the internal surface for better ground protection
- Materials:
 - Metal body and cover: - Die-cast aluminium alloy (AlSi 12)
 - Color: - Grey RAL 7037
 - Coating: - Polyester powder
 - Gaskets: in anti-ageing, oil, greases and fuel resistant silicone
 - Screws: - Steel with Geomet® treatment to prevent corrosion especially with aluminium parts
- Steel zinc plated for screws used internally
 - Metal plates: - Steel zinc plated

Marking:

Westec **8000.6291.0**
YY II 3GD Ex nA
tD A22 IP66
-20°C ≤ Ta ≤ 85°C U

Junction box in accordance with European Directive 94/9/CE

Marking data classification

YY
Year of manufacturing

Ex
Product for use in explosive atmospheres, in accordance with EN Standards

II
Group II product - only for areas different from mines.

3GD
Category 3 products for areas containing gas (G) and dust (D) with normal risk of explosion.
In particular, the product can only be installed:
a) in zone 2 (where it is improbable that an explosive atmosphere of air and flammable substances will form during normal working activity).
b) in zone 22 (where it is improbable that an explosive atmosphere of dust will form, and if so, it will be short-lasting).

nA
nA protection method in accordance with EN 60079-15 (gas).
The components supplied by Westec are classified as type nA by Standard EN 60079-15 so they can only house components of non-sparking type.

tD
tD protection method in accordance with EN 61241-1 (Dusts)

A22
The products supplied by Westec are tested pursuant to Method A provided by EN 61241-1 Standard and are therefore suitable for installation in zone 22.

Ta
Permitted ambient temperature field: $-20^{\circ}\text{C} + 85^{\circ}\text{C}$

IP66
The lighting fixture's protection level against the ingress of solids and liquids, in accordance with EN 60529

U
The junction boxes are components for the purposes of Directive 94/9/EEC so the finished product must be certified by the end user manufacturer.

GENERAL REMARKS

- The plant engineer/client is responsible for classifying areas where hazardous atmospheres can form in order to choose the right product.
- The component supplied by Westec **are only suitable in zone 2 (GAS) and 22 (DUST)**.
- The components must be installed in a thoroughly workmanlike way following the manufacturer's instructions.
- Make the internal and supplementary external earth connections in correspondence with the earth symbol.
- The components supplied by Westec are classified as type nA as per standard EN 60079-15, so they can only contain non sparking components.
- The junction boxes are components within the meaning of European Directive 94/9/EEC so finished products must be certificated by the end manufacturer.
- Use only ATEX certified cable glands with appropriate level of protection and suitable for being installed in zones classified as 2 (GAS) and 22 (DUST).
- The number and the size of the holes are limited by the ATEX Standard. Please see the table on page 58

General technical characteristics and applications

- Metal enclosures for installation, circuit breaking, connection and control of electric and electronic equipments.
- For mechanical and electromechanical industries, industrial automation, automotive, railways, navy, tunnels, parkings, industrial buildings
- The enclosures are in conformance with the Low Voltage Directive 2006/95/EC, with EMC Directive 2004/108/EC where applicable and with the Standards:

EN 62208 Empty enclosures for low voltage switchgear and controlgear assemblies

NEMA 250 National (USA) Electrical Manufacturers Association. Class (Type) of protection.

DIN 40050-9 / ISO 20653: Electrical equipments in road vehicles. Enclosures. Water test with high pressure. IP69K.

NEMA ICS5: Food and beverage industries. High pressure power wash test procedure for self contained control-circuit devices.

- High mechanical strength and vibration resistance.
- Captive screws
- High protection against magnetic interferences
- Anti-ageing materials, water resistant, oil resistant, grease resistant and fuel resistant.
- The enclosures can be mounted internally through holes
- Inside the boxes the DIN rail or the metal plate can be assembled for mounting terminal blocks, breakers, fuse holders, control devices, transformers, electronic circuits, connectors, etc.
- 5 series are available:
 - 1 - Standard with polyester powder coating grey RAL 7001
 - 2 - Standard with polyester powder coating grey RAL 7035
 - 3 - Standard sandblasted without coating.
 - 4 - EMC series. Sandblasted without coating. Pls refer to note of page 18.06
 - 5 - HE type for harsh environmental and for high temperature up to 210°C. Black RAL 9005 with polyester powder coating

- The enclosures HE series have the best performances of the enclosures HE series for the MIC connectors: These performances are listed in the Westec General Catalogue.

- Protection degree according to EN 60529: IP66

- Protection degree according DIN 40050-9: IP69K

- Protection degree according NEMA 250: Type 4,4x,12,13 Type 4x, with coated surfaces only

- Impact resistance EN 62262: IK 09

- Working temperature: - 40°C ÷ + 125°C (+210°C HE Type)

- Max ambient temperature: 75°C
Ambient temperature average value over 24h: 60°C

- Max relative humidity at 25°C: 100%
Max relative humidity at 40°C: 50%

- With ground terminal on box and on cover

- Materials

- Metal body and cover: Die-cast aluminium alloy
- Coating: - Polyester powder coating
- Gaskets: in anti-ageing, oil resistant and fuel resistant silicone
- Screws: - Stainless steel
